PAVING CONSTRUCTION

The Engineering Division of the Public Works Department, with its contractors, CJP & Sons, Inc., has scheduled final roadway paving work for your neighborhood as part of the 2020 Water Main Improvements project.

The Contractor will begin work on, or around, Thursday, April 15, 2021, weather permitting. The work will include removing the existing asphalt trenches and replacing them with new asphalt pavement. It is estimated that these streets will take approximately 4-5 days to complete. The asphalt sidewalk panels will be replaced with concrete sidewalks at a later date. You will be notified separately for that schedule.

Driveway access may be restricted during the work day. The Contractor shall make every effort to accommodate your needs during this construction period.

It is strongly recommended that all vehicles be removed from the project site, as well as areas within 60 feet of each intersecting side street during this time period. Typical construction hours are from 7:00 AM to 4:00 PM. Expect parking restrictions during construction.

We stand committed to making every possible effort to keep disruptions to a minimum and to react to any concerns in a timely fashion. Contact Jay Coy of the Public Works Department Engineering Division at 781-979-4172 or jcoy@CityofMelrose.org with any questions or to arrange for special accommodations.
