SIDEWALK CONSTRUCTION

The Engineering Division of the Public Works Department, with its contractors, D&R Paving, have scheduled sidewalk improvement work for your neighborhood as part of the Hoover School Complete Streets Pedestrian Improvement Project.

Continuing work that began in the spring, the Contractor will begin work on, or around, Wednesday, July 28th, 2021, weather permitting. The work will include removing and replacing the existing asphalt sidewalk with a new concrete sidewalk, installing new concrete sidewalk, resetting and realigning the existing granite curbing, and installing new granite curbing.

Please note that homeowners may experience driveway access delays during the course of the work day. The contractor shall make every effort to accommodate your needs during this construction period.

It is strongly recommended that all vehicles be removed from the project site, as well as areas within 60 feet of each intersecting side street during this time period. Typical construction hours are from 7:00 AM to 4:00 PM. Expect parking restrictions during construction.

We stand committed to making every possible effort to keep disruptions to a minimum and to react to any needs in a timely fashion. Anyone that has questions or requires special needs during this period of construction is asked to contact Scott Dixon of the Public Works Department Engineering Division at 781-979-4172 or SDixon@CityfoMelrose.org.
