

Construction Update – Final Paving April 2022

Dear Neighbor,

We wanted to let you know that during the week of April 18, 2022 crews will be mobilizing to your neighborhood for final paving along Howard Street in Melrose in various areas between Haskell Street and Sweetwater Street. A map with the locations of the street paving work is on the reverse of this letter. This work is a part of the final restoration for the Mystic to Golden Hills Reliability Project – one of several designed to improve the reliability of the electric system serving the Greater Boston area.

What You Can Expect

Final milling and paving will occur between the hours of 7 a.m. – 5 p.m., Monday through Friday. Police officers will help direct traffic and assist anyone who needs to get through the work zones. Initially, the Contractor plans to maintain alternating traffic on Howard St. , which may result in some delays.

First, Howard Street will be milled; next, select storm drains and sewer manhole covers will be raised; and then, the final topcoat of paving will be done. This work is expected to take about seven business days to complete.

Please note: During paving activities, there will be **no street parking** and access to and from your property may be temporarily delayed. Pavement needs to cool down before cars can drive on it without causing any damage. During construction, you may want to park your car on a side street if you need to get out during the day. Please let us know if you have any medical needs or other issues that make access critical.

Due to weather, or unexpected circumstances, work hours may be extended or the start date may be delayed.

Thank you

On behalf of the entire Eversource team, thank you for the patience, cooperation, and understanding that you've extended to us throughout the duration of this Project. This Project improves the reliability of greater Boston's electric grid, and we are grateful for your partnership in working to accomplish this goal.

Sincerely,

Paul Graham
