WATER SERVICE LINE REPLACEMENT PROGRAM WORK NOTICE

NOTICE

To: Nowell Road, Henry Avenue, Taylor Street Area Residents

Meeting Date: July 27, 2022

Subject: 2023 Water Main Improvement Project and Neighborhood Meeting

As part of the City's program to upgrade our water distribution system, we will be working in your area along with our contractor, Cardillo and Son, Inc., beginning around the end of August with the installation of the water bypass system. Water system upgrades will take place on the Henry Avenue, Nowell Road, and Taylor Street, and will include replacement of the water main in the street with a larger main as well as replacement of the service lines from the City's water main to the new curb stop (the shut-off valve in the sidewalk or at the property line).

We are holding a neighborhood meeting on Thursday evening, July 27, 2023, at 6:00 PM to discuss this project and answer any questions you may have. We will meet at the intersection of Taylor Street and Nowell Road. Please note, the meeting will end promptly after 30 minutes. In the event of rain, we will move the meeting to Monday July 31st at the same time and place.

During the course of this work, Henry Ave, Nowell Rd, and Taylor St area residents will experience brief periods of interruption of water service, and all area residents may experience inconveniences due to traffic disruption, parking restrictions, and other impacts typical of heavy roadway and utility construction. You will be notified individually prior to any planned water service disruptions. We will do our best to keep disruptions to a minimum and to complete the work in a timely fashion.

The impacted area of the roadway will receive temporary paving following construction. The City's Contractor will return in 2024 to complete final curb to curb pavement restoration.

Melrose DPW will have a full-time inspector on the project site from our Water and/or Engineering Divisions throughout the work. If you have questions during construction, please ask the City employee onsite or call Melrose Engineering Division at 781-979-4172.

Thank you for your patience during this important project.
