HISTORY AND DEVELOPMENT

Melrose recognized its independent identity and separated itself from Malden to become an individual town in 1850, an action which, in the words of the Joint Special Committee, "would contribute to the convenience, harmony and prosperity of the inhabitants, and would be no injury or disadvantage to the remaining part of Malden. It would leave a fine, pleasant and prosperous town, within full view, and in the immediate vicinity of Boston, affording many eligible building sites, and containing numerous valuable farms."

Melrose thus began as a residential and business nucleus on the ancient main road from Chelsea to Reading. Development of this nucleus has therefore been linear along what is now Main Street, with further linear development after 1845 along the Boston and Maine railroad a block or so west of Main Street. From this original core the Town and later the City (1899) has expanded as an almost entirely residential community set amid streams, ponds and rocky hills which remain wooded and wild to this day.

In the mid nineteenth century Main Street in Melrose had on both sides wooden residences, many of which had shops or stores on the ground floor. By the third quarter of the century business was tending to crowd out residential use and this trend was accentuated by a great general fire in 1870 which destroyed most of the stores and dwellings on Main Street from Foster Street to Essex Street. The new construction which replaced the old wood buildings
was generally of brick, and several of the principal structures on Main Street today date from this period: The Standard Building (1876); Hill's (1870); Melrose Plaza (1875) and the Boardman Building (1876).

The Main Street commercial center was filled out in the 80's and 90's by major buildings which are seen today: Clement's store (1891), Eastman's Block (1888), Stearns and Hill Building (1896) and the Melrose YMCA (1894). Main Street was a prosperous principal thoroughfare with public transportation by horsecars after 1887 and trolleys after 1892, along with private vehicles - though parking was already a problem, as shown by the Aldermen's order of 1900 forbidding the tethering of horses to trees and shrubs. Several important large buildings were lost by fire and were replaced by the present one-story structures. Others, such as Eastman's Block, lost their mansard roofs, bay windows and upper floors with a consequent diminution of character. Nevertheless, the present ensemble of buildings in Downtown Melrose has cohesive Nineteenth Century character which can and should be recognized and enhanced as the basis for a renewed identity and vitality for this centrally located commercial area.

The last major addition to the Downtown Melrose Business District came in 1926 with construction of the classically dignified and well-designed Melrose Savings Bank. Since that time change in the area has largely been superficial "modernization" in an effort to disguise the age of the buildings and compete on an "up-to-date" basis with outlying shopping centers which, with their free parking, have until recently been draining business from
Downtown. This is a familiar process and problem faced by many older communities, the most forward-looking of whom have begun to realize that their old downtown business areas, far from being obsolete and in need of replacement, are instead an historic asset to be recovered and used for new meaning and prosperity in the community.

PRESERVATION AND RENEWAL BY HISTORIC DISTRICTING

A turnaround in attitude toward the City's historic buildings and especially its historic business district, has occurred gradually in the last few years through the survey work and studies of the Melrose Historical Commission and the popular tours and publications initiated by the Victorian Melrose Society. Both groups and other citizens as well, have been responding to the rapidly growing national and state interest in identifying, preserving and properly using the cultural and architectural heritage which has come down to us from the three and one half centuries of our country's development. National interest in these matters was embodied in the National Historic Preservation Act of 1966. Among the provisions of this Act was creation of The National Register of Historic Places, a master list of "districts, sites, buildings, sites and objects that possess integrity of location, design, setting, materials, workmanship, feeling and association" and have significance in relation to important historical events or persons or as examples of type, period or method of construction or as the
work of a master or as examples of high artistic value. The National Register also includes historic districts and as of 1976, the most recent edition of the Register, more than 1000 historic districts as well as some 12,000 individual properties were listed.

In addition to setting up the National Register of Historic Places the National Historic Preservation Act of 1966 established a program of matching money grants for preservation activities in connection with National Register properties and districts. These funds are disbursed by the various state Historical Commissions and are managed here by the Massachusetts Historical Commission located at 294 Washington Street in Boston. In 1978-79 the Massachusetts Historical Commission awarded matching grants totalling more than one million dollars to owners of National Register properties for historic preservation projects. Should Downtown Melrose become a National Register Historic District or a Local Historic District which meets national standards all property owners within the District boundaries would be eligible for such matching grants.

STATE HISTORIC DISTRICTS

In Massachusetts enabling legislation giving cities and towns power to set up and regulate historic districts was passed by the General Court in 1960 as Chapter 40C of the General Laws. Since that time more than sixty communities have established one or more historic districts within their borders to preserve and protect areas and structures which are deemed to have national, state or local historic significance. Chapter 40C sets up the methods of
forming and administering local historic districts and these will be discussed later in this Report.

PROPOSED DOWNTOWN MELROSE HISTORIC DISTRICT

In recent years a number of forces have combined to generate and put forth the idea of making Downtown Melrose an historic district. The Community Development Department of the City has seen historic district status as not only a justification for public funding assistance for rehabilitation of the area but also as a stimulus to private forces to do the same thing. The Melrose Historical Commission through its studies has recognized the unity of the historic heart of Melrose along Main Street and has been aware of the benefits to be gained by protecting this important group of structures which give the city focus and identity. Similar perceptions have been developed also by private groups as previously mentioned, with the result overall that in 1977 the Mayor and Board of Aldermen appointed an Historic District Study Committee to look into the matter and submit a Report, of which this document is the Preliminary version. The Study Committee retained the firm of Bastille-Neiley, Architects and Consultants, of Boston to make the required building-by-building research and survey, to advise on boundary and administration matters and to prepare the required detailed survey forms and reports which are included herewith.
NATURE AND PROPOSED BOUNDARIES OF THE HISTORIC DISTRICT

The Study Committee and its consultants, after lengthy consideration have concluded that three distinct yet contiguous areas along Main Street constitute an historic unity important and indeed essential to the continued identity and focus of the City of Melrose. These are, from south to north, the Commercial Center running from the intersection of Main and Foster Streets to the intersection of Main and Essex-Upham Streets; The Civic Center, running from Essex-Upham Streets to near Winthrop Street and The Old Residential Area, including both sides of Winthrop Street and the various period houses on both sides of Main Street up to East and West Emerson Streets.

The Commercial Center, despite some undesirable alterations and intrusive structures, has an impressive Late Victorian character which is worthy of preservation and enhancement through programs of repair, restoration, and maintenance, along with improvements to signage, street lighting, paving and other public amenities. It has some excellent buildings of several periods - the aforementioned Melrose Savings Bank, The Standard Building and the Melrose YMCA, (arguably the best building on Main Street in terms of dominant location, general design, and use of fine materials with careful details.)

Similarly the Civic Center boasts an important and varied group of public buildings, churches and the remarkably solid and impressive Old High School. In contrast to the continuous
stretscape of the Commercial Center, each building in the Civic Center stands alone in generous open space, a fact which gives the group and the area an appropriate sense of monumentality.

Adjoining the Civic Group in another almost surprising change of scale and use is the Old Residential Area. Most important here are the modest single houses of the 1840's and 50's in simplified Greek Revival style which line the first part of Winthrop Street. These houses exemplify the transition from open farm land to the residential use which has become characteristic of the City. Beyond them on Main Street are examples of subsequent Melrose houses of different periods including Bracketed Italianate, Mansard and the rich Queen Anne exuberance of the First Methodist Parsonage. In this small area, almost as if by design, much of the history of individual houses in Melrose is shown in microcosm.

The boundary proposed to surround these three different but closely related historic areas follows in general the rear lot lines of the various properties. It includes all four corners of the intersection of Main and Foster Streets in order to protect wholly this most important gateway to Historic Melrose. Similarly, both sides of Winthrop Street and North Main Street are included, since unguided development of one side of an historic street can be incongruous and destructive of historic values. It is important that changes in this area, including new construction on presently vacant land, should be subject to public review and approval in order to maintain or even augment the value of the Historic District.
THE NATURE OF HISTORIC DISTRICT PROTECTION

The objective of the Melrose Historic District Study Committee in proposing The Downtown Melrose Historic District is to provide protection against inappropriate change in one of the City's most significant historic areas. Historic District status would provide this protection by giving an Historic District Commission the authority to review all new construction, additions, and alterations to structures within the District and visible from a public way. This authority is derived from Chapter 40C of the General Laws of the Commonwealth.

Just as zoning is intended to protect property owners against inappropriate uses or bulk of buildings next door or in the immediate neighborhood, so inclusion in an Historic District is intended to prevent incongruous changes or developments in the District which might hurt or destroy the character and setting of structures with historical significance.

Thus, when a property owner proposes alterations or changes, the neighbors in the Historic District will be informed and given a public hearing before a building permit will be issued. Under the Historic Districts Act, the Historic District Commission provides the notice and hearing, and then issues one of three certificates: (1) Certificate of Appropriateness; (2) Certificate of Hardship; or (3) Certificate of Non-applicability.
OBJECTIVES

The purpose of Historic Districting is stated in the enabling legislation, Chapter 40C of the General Laws. The Act is intended "to promote the educational, cultural, economic and general welfare of the public through the preservation and protection of the distinctive characteristics of buildings and places significant in the history of the Commonwealth and its cities and towns or their architecture, and through the maintenance and improvement of settings for such buildings and places and the encouragement of design compatible therewith."

The first Massachusetts Historic Districts, on Beacon Hill and in Nantucket, were established by Special Acts in 1955 following an opinion of the Massachusetts Supreme Judicial Court that such legislation was a constitutional use of the State's power to promote the public welfare. The Massachusetts Court cited a United States Supreme Court decision in the case of Berman vs. Parker (1954).

The concept of the public welfare is broad and inclusive. The values it represents are spiritual as well as physical, aesthetic as well as monetary. It is within the power of the legislature to determine that the community should be beautiful as well as healthy, spacious as well as clean, well balanced as well as carefully patrolled.1

More recently, the Massachusetts Supreme Judicial Court has ruled, in connection with the right of a municipality to prohibit billboards, that "aesthetics alone may justify the exercise of the police power," and quoted Article 97 of the Amendments to the Massachusetts Constitution, which established as state policy the right

of the people to "the natural, scenic, historic, and aesthetic qualities of their environment."}

The courts have also upheld historic districts on the grounds of their contribution to the economic well-being of a community. The Supreme Judicial Court in the Nantucket opinion noted that "the erection of a few wholly incongruous structures might destroy one of the principal assets of the town." The courts have noted that these benefits may accrue to the individual property owner well as to the community at large, but have considered that public purposes are served if the public good, measured in terms of increased property value or business volume, outweighs private costs.

It has been judicially determined that historic district legislation does not constitute a taking of private property without compensation, and it has been noted that many zoning ordinances are as demanding in their application. Once again, the public benefit is held superior to a reasonable degree of private sacrifice, a principle that was recently upheld by the Supreme Court of the United States in confirming the landmark designation of Grand Central Terminal in New York City.

Power to establish historic districts is not given lightly. Chapter 40C requires a thorough survey and report on the areas

---

4T. J. Reed, Land Use Controls in Historic Areas, 44 Notre Dame Lawyer 3, 387.
proposed for protection; review and comment by other public agencies; a public hearing with notification of all affected property owners; and passage of the Historic District Ordinance by the Board of Aldermen by a two-thirds majority. Once a District has been established, the Historic District Commission holds the power to review all construction and alterations of structures that will be visible from a public street, sidewalk, park, or body of water. This authority cannot be arbitrarily exercised, however; the legislation requires that a Commission "shall not make any recommendations or requirement except for the purpose of preventing developments incongruous to the historic aspects or architectural features of the . . . district." The Supreme Judicial Court, in reviewing the Nantucket ordinance in 1955, warned that enforcement actions would need to be carefully circumscribed, since in some instances decisions of an Historic District Commission might give rise to "peculiar hardship and remoteness from the legitimate purpose of the act" which would amount to unconstitutional applications of it. Accordingly, the legislation establishes a time limit requiring a Commission to act on a petition within a given period, and provides for appeal of Commission decisions.

ADMINISTRATION OF HISTORIC DISTRICTS

The administration of Historic Districts is guided in every respect by the provisions of Chapter 40C, except as specially provided for in the local ordinance creating the district, or as established as a policy by an Historical Commission.
All buildings of whatever size or function, as well as all structures, including signs, fences, walks, terraces, driveways, walls, light fixtures, or the like, which are "open to view from a public street, public way, public park or public body of water", fall within the review of the Commission. Building projects which must be reviewed include construction, reconstruction, erection, demolition, and removal, as they affect exterior features of a structure visible from a public street, way, park, or body of water. Such features include, but are not limited to, the kind, color, and texture of exterior building materials, and the type and style of windows, doors, lights, signs, and other fixtures.

Although the legislation provides for Commission review of every exterior architectural feature visible from a public way, certain items may be excluded from control when the Ordinance is drafted. The proposed Melrose Historic District Ordinance would exclude from review the following: a) paint colors (except paint proposed for masonry or materials now unpainted), b) storm doors and windows, c) antennae and the like, d) temporary signs and e) signs one square foot or less in size. An Historic District Commission may also impose dimensional and set-back requirements more stringent than required by the zoning code. However, a Commission may make no conditions "except for the purpose of preventing developments incongruous to the historic aspects or architectural characteristics . . . of the historic district."
The Commission would issue three types of certificates as the basic administrative method by which proposed alterations are reviewed, and no building or demolition permit for work in a District may be issued by the City until a Certificate has been issued by the Historic District Commission.

Each type of certificate is issued after evaluation of the circumstances. A Certificate of Appropriateness would be issued when the Commission has determined that a project is not incongruous with the preservation of the historic district; this is the most common Certificate issued by most Commissions. A Certificate of Nonapplicability is issued for a project which the Commission determines does not involve an exterior feature, or one not visible from a public way. Finally, a Certificate of Hardship may be issued when refusal to issue a Certificate of Appropriateness or Nonapplicability would cause the applicant substantial hardship, financial or otherwise, as long as there is no substantial detriment to the district.

Application for a Certificate is made by submitting a description of the proposed alteration along with plans or photographs sufficient for the Commission to judge the effect of the proposed alteration. The Commission must determine within fourteen days of an application, what type of Certificate is required.

In passing on applications for Certificates, a Commission is required to consider, among other things, the historic and architectural values and significance of the site, building, or
structure, the general design, arrangement, texture, material and color of the features involved, and the relationship of these features to similar features of buildings in the surrounding area. In the case of new construction or additions to existing buildings, the Commission must consider the size and shape of the building, in relation to both its site and surrounding buildings, and can require modifications of volume, height and setback in addition to those required by zoning. The Commission can also establish appropriate designs or lists of paint colors, roofing materials, or the like for the guidance of property owners.

A Commission may not review alterations to interiors of structures, nor alterations which are not visible from a public way, even though such alterations may still be within a District. Furthermore, landscaping with plants, trees or shrubs is specifically excluded from review, and the Commission is not concerned with ordinary maintenance, repair, or replacements that do not involve a change in exterior appearance. Enactment of an Historic District in no way requires owners to alter their properties, nor requires restoration of a structure to any set historical period. Work must be reviewed only if it involves a change from that which exists on enactment of the Ordinance; maintenance or replacement of an architectural feature incongruous with the historic or architectural feature incongruous with the historic or architectural qualities of the District may take place without a Certificate as long as there is no change in exterior appearance.

If a Commission deems the alteration to require a Certificate, it may take action either through a public hearing or by simple
vote after notice to surrounding property owners. A public hearing is held in the event that the alterations are deemed substantial; surrounding property owners are given two week's notice, and the application is given consideration in terms of the criteria listed above. However, if the application involves an alteration which is considered insubstantial in its effect, the Commission may simply vote on the matter after allowing ten days for comment by surrounding property owners.

If the Commission disapproves the application for a Certificate, it must give its reasons to the applicant in writing. However, the Commission is specifically authorized to make recommendations for changes which would make the application acceptable. If the applicant modifies the application to conform to the Commission's suggestions, a Certificate must be issued.

An applicant aggrieved by a decision of the Commission may appeal to the Superior Court sitting in equity for that County; costs are not assessed against the person appealing unless the court finds that action was taken in bad faith. Similarly, the Superior Court may enforce the provisions of the Historic District legislation through injunction, court order, and fine.

Establishment of An Historic District

Procedures for creation of an historic district are established by the Massachusetts Historical Commission. The first step is organization of an Historic District Study Committee, a group of residents appointed by the Mayor and approved by the Board of Alderman. This Committee, whose names are listed elsewhere in this
Report, has conducted a survey of buildings in the proposed District, indicated the boundaries of the District, held special group and public hearings on the matter and has performed the various other procedures required by law.

This Report is being submitted to the Massachusetts Historical Commission, the Planning Board, and all property owners within the proposed District. Sixty days after release of this Report a public hearing will be held to allow comments to be heard and recorded.

Following the public hearing the Study Committee will prepare a Final Report which takes into account any comments received. This Report will then be submitted to the Melrose Board of Aldermen which may, by a two-thirds majority, enact the Ordinance creating the Historic District. The District becomes effective after an official map showing its boundaries has been filed with the Registry of Deeds. A copy of the proposed Historic District Ordinance is included later in this Report.

**The Historic District Commission**

Following approval of the Historic District Ordinance the mayor must appoint the Historic District Commission whose duty will be to administer the District. By law the Commission may have from three to seven members and must include an architect, a realtor, an historian and an owner or resident of the Historic District. Members serve for three year terms and may be re-appointed. The proposed Melrose Historic District Ordinance also requires that one member of the Commission be an attorney.
The Commission can be expected to meet on a regular monthly basis to consider applications for Certificates of Appropriateness and other business related to the Historic District.

It should be borne in mind that the Downtown Melrose Historic District must be created by a two-thirds vote of approval by the Board of Aldermen, such vote presumably expressing the approval of the Community as a whole. If at some time in the future the Aldermen and the community should feel that the Historic District is no longer valid or useful, the Aldermen could dissolve it by the same two-thirds majority which created it. The likelihood of such action, however, appears to be remote, since in Massachusetts more than 60 cities and towns have created historic districts for themselves, and to date none has ever been dissolved or reduced in size. A number of districts, moreover, have been increased in size, the advantages of historic district protection having been tested and recognized.
CITY OF MELROSE

In the year one thousand nine hundred and seventy-nine AN ORDINANCE relative to the establishment of Historic Districts.

Be it ordained by the Board of Aldermen of the City of Melrose as follows:

Section I. The Revised Ordinances of the City of Melrose be amended by adding thereto the following Chapter.

Chapter

This ordinance shall be known and may be cited as the Historic Districts Ordinance under authority of Massachusetts General Laws, Chapter 40C, as amended.

The purpose of this ordinance is to promote the educational, cultural, economic and general welfare of the public through the preservation and protection of the distinctive characteristics or architecture of buildings and places significant in the history of the Commonwealth and the City of Melrose, and through the maintenance and improvement of settings for such buildings and places and the encouragement of design compatible therewith.

a) In accordance with the Historic Districts Act, Massachusetts General Laws, Chapter 40C as amended, there is hereby established the Melrose Historic District Commission, which shall have all the powers and duties of an Historic District Commission under said General Laws.
b) All members and alternate members of the Commission shall be appointed by the Mayor, subject to confirmation by the Board of Aldermen. The Commission shall consist of seven members including one member, where possible, from two nominees submitted by the local historical societies; one member, where possible, from two nominees submitted by the Massachusetts Chapter of the American Institute of Architects and one member, where possible, from two nominees submitted by the Boston Society of Landscape Architects and one member where possible, from two nominees submitted by the Eastern Middlesex Board of Realtors. The Commission shall also include a lawyer and one or more residents or owners or renters of property in the historic district to be administered by the Commission.

c) When the Commission is first established, two members shall be appointed for a term of one year, two shall be appointed for a term of two years, and three shall be appointed for a term of three years and their successors shall be appointed in a like manner for terms of three years. When the Commission is first established, one alternate member shall be appointed in like manner for a term of one year, one alternate member for a term of two years and one alternate member for a term of three years and their successors shall be appointed in like manner for terms of three years. All vacancies shall be filled in like manner for the unexpired term.

d) All members of the Commission shall serve without compensation.

e) The Commission shall elect annually a chairman and vice chairman from its own number and a secretary from within or without its number.
Section Commission May Adopt Rules & Regulations and Employ Technical Personnel

The Commission shall adopt rules and regulations for the conduct of its business not inconsistent with the provision of the Historic Districts Act, Massachusetts General Laws, Chapter 40C, as amended. The Commission may, subject to appropriation, employ clerical and technical assistants or consultants and incur other expenses appropriate to carrying on of its work, and may accept money gifts and expend the same for such purposes.

Section Meetings - Quorum - Time for Action

Meetings of the Commission shall be held at the call of the Chairman and shall be called at the request of two members of the Commission and in such other manner as the Commission shall determine in its rules. A majority of the members of the Commission shall constitute a quorum. When taking action under the provisions of the fourth paragraph of Section 11 of the Historic Districts Act, the Commission shall make its determination within forty-five days after the filing of the application for a certificate of appropriateness, or such further time as the applicant may in writing allow.

Section Establishment of Historic District

There is hereby established under the provisions of Massachusetts General Laws, Chapter 40C, as amended an HISTORIC DISTRICT to be known as: THE DOWNTOWN MELROSE HISTORIC DISTRICT, shown on a plan entitled, "Proposed Downtown Melrose Historic District dated 19 , showing in general a boundary following rear
property lines of properties bordering Main Street from the intersection of West and East Foster Streets to the south side of West and East Emerson Streets, said plan having been approved and signed by the Superintendent of Public Works, placed on file at the offices of the City Clerk and the Building Inspector, recorded in South Middlesex District Registry of Deeds and included herewith as part of this Ordinance.

The establishment of the said Historic District under this section shall take effect when all the Commissioners are appointed by the Mayor and confirmed by the Board of Aldermen.

Section **Exclusions From Review By Commission**

a) The following categories of buildings or structures or exterior architectural features may be constructed or altered within an historic district without review by the Commission:

1) Temporary structures or signs, subject, however, to such conditions as to duration of use, location, removal and similar matters as the Commission may reasonably specify.

2) Terraces, walks, driveways, sidewalks and similar structures, or any one or more of them, provided that any such structure is substantially at grade level. This is not to be construed as to include parking lots.

3) Storm doors and windows, screens, window air conditioners antennae and similar appurtenances.

4) Paint colors, except for paint proposed for masonry or any materials now not painted.

5) Signs of not more than one square foot in area in connection with use of a residence for a customary home occupation or for professional purposes, provided only one such sign is displayed
in connection with each residence and if illuminated is illuminated only indirectly.

6) The reconstruction, substantially similar in exterior design, of a building, structure or exterior architectural feature damaged or destroyed by fire, storm or other disaster, provided such reconstruction is begun within one year thereafter and carried forward with due diligence.

The authority of the Commission shall be limited to exterior architectural features within the designated district which are subject to view from a public way.

Section Severability

In case any section, paragraph or part of this ordinance be for any reason declared invalid or unconstitutional by any court of last resort, every other section, paragraph or part shall continue in full force and effect.

Area number | Form number
--- | ---

1. **Town** Melrose, Massachusetts
2. **Address** 476 Main Street
3. **Name** Melrose Savings Bank
4. **Date** 1926 (Building permit)
5. **Style** Neo-Classical
6. **Architect** Alden & Parker, Boston
7. **Builder** Chester S. Patten, Melrose
8. **Owner (original)** Melrose Savings Bank
   **(present)** Melrose Savings Bank
9. **Use (original)** Commercial
    **(present)** Commercial
10. **Lot size** 5,904 Sq. ft.
11. **Distance from St.** 4 ft.
12. **Approximate frontage** 82 ft.

13. **Building type** Bank
14. **Plan type** Square, central hall
15. **No. of stories** 2-1/2 bays 3
16. **Foundation** Concrete
17. **Walls** Cast stone
18. **Roof forms** Flat
    **materials** Tar and gravel
    **features**
19. **Chimney(s)**
20. **Doors and windows** Large plate glass windows with anodized aluminum frames. Formal classic entrance.
21. **Porches and additions** 1966 addition 23' x 65' to the south.
22. **Outbuildings**
23. **Alterations** Clock added at corner
24. **Present condition** Excellent
25. **Other exterior features** Central entrance with pilasters and segmental pediment; cast iron lanterns, either side of entrance; overhanging cornice, with brackets; inscription above cornice on Main Street facade. Shallow vertical panels at corner with bas-relief panels above.
26. Surroundings

(Landscaping, parks, sidewalks, buildings or alleyways that border the building).
On the corner of Main Street and West Foster Street; abuts building to the south, landscaped lot to the rear of the building.

27. Importance to setting

(great, moderate, minor, none, detrimental)
Primarily as a protective boundary structure, but also for its clear and forceful architecture.

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)
The Melrose Savings Bank is a fine example of the Neo-classical style. It is well built and maintained, with an addition to the south that harmonizes with the main block. Its immaculate upkeep along with planters and landscaping which surround the building, create an ideal protective boundary as well as adding architectural significance to the district.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)
The Melrose Savings Bank is the oldest bank in Melrose, chartered on April 5, 1872. It was contained in the Town Hall between 1874-1891, and in Newhall's New Block between 1891-1926.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)
This fine building gives an air of quality to the business district and should be carefully preserved with minimum exterior alteration.

31. Bibliography, references, sources of dates

13. Building type Meeting hall

14. Plan type Rectangular

15. No. of stories 2  days

16. Foundation Brick

17. Walls Brick, clapboard, and mosaic and glass panel front.

18. Roof forms Gable end toward street, flat roof on new facade. Materials Asbestos and tar and gravel features

19. Chimney(s) 1

20. Doors and windows Glass windows the entire length of the facade along 1st and 2nd story, central entrance, double glass door.

22. Outbuildings None

23. Alterations W. Foster facade extends 2-1/2 stories on a building originally 2 stories.

24. Present condition Good

25. Other exterior features Flagpole to the west end of the facade extending through opening in Overhanging roof.
26. Surroundings

(Landscaping, parks, sidewalks, buildings or alleyways that border the building).

Alleyway to the east; parking lot entrance to the west.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

Originally two stories with turrets on east end of building. Present facade result of 1961 modernization costing $60,000. Tully & Scibelli were the architects and Scott Builders, Inc. executed alterations.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

Originally Dills' Block (1892), stores and second floor hall, built by J. A. Dill, a well-known and respected Melrose caterer.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Abuts the Standard building to the East; alleyway to the west.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

In 1919 a cement block addition was made to the rear of the building by the Bay State Realty Trust Company.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

This small structure relates well to the brick Standard Building of 1876 which it abuts. It could be improved by new signage and clean-up of the alley beside it.

23. Alterations Aluminum storefronts & signs 2nd floor fenestration; part of the belt course; steps removed.
24. Present condition Fair
25. Other exterior features Paired brackets at dentilled cornice of wood. Dormers with elaborate brackets and moulded pediments.
26. Surroundings
   (landscaping, parks, sidewalks, buildings or alleyways that border the building).
   On corner of West Foster Street and Main Street

27. Importance to setting
   (great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance
   (other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)
   The Standard Building is an excellent example of Victorian Commercial Architecture, which has retained much of its original character and serves its original function.

29. Historical and social data/significance
   (national, regional or local importance relating to events, personages, themes)
   This structure is also known as the Bugbee and Barrett Building, from the original owners and builders in 1876, Samuel S. Bugbee and J. Augustus Barrett. They occupied the block as grocers through the turn-of-the-century. The second story contained a meeting hall used for a variety of community functions.

30. Preservation considerations
   (accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)
   The Standard Building retains much of its original character and should be preserved and enhanced as a key structure in the Downtown area.

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators,
etc., characteristics of architectural style, specimen or period, or architect,
builder; or construction method, extent of surviving original material)

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)
Initially this site was occupied by a 2-1/2 story Mansard building with
ornamentation similar to that of the adjacent Standard Building and was
owned by J. A. Dill, a prominent Melrose caterer. It later passed to
Herbert W. Hopkins who used it as an ice cream store until 1957 when it was
destroyed by fire, and in 1959 replaced by the Shawmut-Melrose-Wakefield Bank.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment,
protection, utilities, context)

This building is very different in scale and general design from other
structures on Main Street. It could be revised to make it more harmonious in
the streetscape

Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Abuts a 1-1/2 story building to the south and a 2 story building to the north.

Importance to setting

(great, moderate, minor, none, detrimental)

Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

In 1951 Raye Johnson and the owner, Samuel N. Poorvu removed the 2nd story of the original brick and constructed a 15' x 32' addition to the rear.

Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

The present building was built in 1900 by S. E. Benson containing stores and an office. Westgate's Hall 2nd story, a popular town meeting place in the 1880-1890's, originally occupied the site.

Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Alleyway to the north; abuts one-story 20th century building to the south.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

The Hill Building (Larrabee's New Brick Block), is a fine example of the Bracketed-Mansard Victorian style. It exhibits extensive ornamentation in the fenestration and has undergone alteration only along the storefront elevation, and an addition on the rear second story.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

Previous to 1870 this site was occupied by the Lyceum which burned in the great fire of August, 1870. Samuel A. Boardman rebuilt Unity Hall on the foundation and walls remaining after the fire. In 1880 John F. Larrabee purchased Unity Hall and extensively reconstructed the building to create Larrabee's New Brick Block.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

Preservation and enhancement of this building is very important to maintain the historic quality of Main Street

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

John Larrabee's three story Mansard was built in 1870 on this site and housed his residence and apothecary shop. This structure was moved south and incorporated into the construction of Larrabee's New Block in 1888. Original cast-iron storefront remains intact. The 2nd and 3rd stories were removed in 1962.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes) John Larrabee, well-known Melrose Pharmacist, owned the apothecary at 506 Main Street from 1870-1913. Original occupants of Larrabee's New Block, included "The Melrose Reporter" on the entire second floor.

28. Further explanation of architectural data/significance
   (other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

   This building has undergone extensive facade alterations, since its construction between 1875-1885. A rear brick addition was constructed in 1911 by A. D. MacLachlan, built by C. L. Hoffman.

29. Historical and social data/significance
   (national, regional or local importance relating to events, personages, themes)
   The only commercial building on the west side of Main Street that did not rise above one story.

30. Preservation considerations
   (accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context).
   Though this building is old, its original one story height was incongruous on the street. It might well be replaced by new three-story construction.

22. Outbuildings
23. Alterations north end of cornice removed; fenestration;
24. Present condition poor
25. Other exterior features paired "c" scrolled
brackets on the dentilled cornice, 2/3's length
of the building
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Abuts a one-story building to the south; corner of Essex Street and Main Street.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

Early photographs of the Boardman Block reveal that the building always had irregular fenestration, which created visual interest along Main Street.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

The present building replaced a previous three-story clapboard block destroyed by fire on November 30, 1875. George F. Boardman immediately rebuilt on the foundation of the burned Boardman Block. The Melrose Journal offices occupied the building in the 1890's.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

With the removal of artificial siding, the vertical clapboards on the north end, minor simplification of first story storefronts and new signage, the Boardman Block could be greatly improved.

28. Further explanation of architectural data/significance
   (other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

   Built originally as the Upham Street High School in 1855, this building was moved by George F. Boardman, converted to shops at the Essex Street location. Building burned in the November 30, 1875 fire, and was rebuilt as a one-story commercial block.

29. Historical and social data/significance
   (national, regional or local importance relating to events, personages, themes)

   Walter and Rufus Smith began their boot and shoe repair shop in 1859. They later opened a bicycle and automobile garage and repair shop, a familiar and successful Melrose business.

30. Preservation considerations
   (accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

   This small building has an interesting history and relates strongly to the adjacent Boardman Block. It should be restored and preserved.

(national, regional or local importance relating to events, personages, themes)

The Melrose Post Office was located on several other sites before occupying its present location. The first Post Office was located in the town Railroad Station and moved in 1871 to 39 Essex Street with funds from Susan S. Eastman. It remained there until 1891, when it moved to the Burrell & Swett Block, and moved in 1901 to the Burrell & Swett New Block, where it remained until 1924.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

The present post office is on no architectural distinction, but is soundly constructed and adaptable to other uses.

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

The erection of the Town Hall began in 1873 and an opening ceremony was held on June 17, 1874. John Stevens' Second Empire design was originally three stories with slender elongated second-story windows and palladian dormers, and an intricately designed massive clock tower. The present one-story annex addition to the north was constructed in 1925 for $63,000 by Hudson Contracting Company in the (see continuation sheet)

29. Historical and social data/significance

(national, regional or local importance relating to events, personalities, themes)

Prior to 1870, town meetings were conducted in Lyceum Hall which was destroyed by fire on August 20, 1870. The new Town Hall was built on land previously owned by George W. Newhall and Mary Dix. The clock tower served as a focal point for the town center of Melrose until the remodelling that took place in 1939.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

The Town Hall, though much reduced in architectural impact, is still a key downtown structure worthy of improved landscaping and re-designed access ways.

Indicate each item on inventory form which is being continued below.
Second Empire style. The Town Hall suffered extensive water damage from a fire on February 17, 1937. Rather than rebuild, the building was completely remodelled as a Public Works Administration project. The remodelled design (by Mowill and Rand) resulted in the removal of the top two stories and clock tower. A more streamlined second-story and clocktower replaced the original and only the first story remains intact.

GIVE A BRIEF DESCRIPTION OF SUBJECT MATTER AND/OR DESIGN OF MONUMENT

The vase is a cast iron urn set upon cast iron pedestal (approx. 2' height). There is an elaborate cast scroll design on urn, the stem, base and pedestal planted annually with flowers.

GIVE A BRIEF DESCRIPTION OF HISTORIC IMPORTANCE OF MONUMENT. (Refer to the theme circled on front of form. What happened? Who was important? Comment)

A gift of the Melrose Improvement Society, the urn was one of many contributions made by the Society in their efforts to beautify Melrose. The Society was founded in 1881 by a group of concerned and prominent citizens.

Bastille-Neiley Architects . Boston . Survey Form 3 - 1978
13. Building type: Fire Station
14. Plan type: Rectangular
15. No. of stories: 2½ bays: 3
16. Foundation: stone
17. Walls: brick
18. Roof forms: pyramidal
   materials: slate
   features: dormer windows in east and west elevations; copper flashing
19. Chimney(s): (1)
20. Doors and windows: 3 garage doors, 1st story;
   (4) 4/1 windows, 2nd story; dormers in roof.
21. Porches and additions
22. Outbuildings: None
23. Alterations: cupola removed in 1923 from tower.
24. Present condition: good
25. Other exterior features: tower to south, rear; arched garage openings with keystones, scrolled; entablature with enriched modillions; limestone trim.
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Driveways to the north and south; sited between City Hall and Memorial Hall.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

The Fire Station, built by Lewis A. Dow, a Boston architect, exists in its original condition with the exception of the tower cupola which was removed in 1923. The cupola was removed due to its deteriorating condition. The sliding garage doors were also replaced by roll doors.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

The Fire Station was originally located across the street from its present location between the First Baptist Church and the Old Burying Ground. The 1895 erection of the present Fire Station was a successful addition to the expanding civic area.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

Replacement of the cupola would add greatly to the architectural integrity of the building.

West side Main Street; North-residential, South-asphalt drive and Central Fire Station. Lawn and shrubs. Concrete sidewalk.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

Built of Quincy granite from the Old Boston Court House (1830), Memorial Hall was dedicated-December 14, 1912. The Hall was closed in 1925 for a year while an addition was constructed to the rear. The settling of Dix Pond fill also required shoring of rear foundation. J. R. Worcester & Co. were architects for addition built by Casey & Darey Co. for $35,000 in 1925.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)
A Memorial Hall to Civil War Soldiers & Sailors was proposed in 1894. The construction of the Hall was largely made possible by a $17,500 contribution from ex-alderman, John C. F. Slayton. An Austin organ was given by Slayton and dedicated W.W.I. Veterans on Jan. 22, 1919. The dedication of Memorial Hall completed the Civic Area as it presently stands.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)
Memorial Hall is a structure of impressive architectural quality which is very important to Downtown Melrose. Its interiors are elaborate, the organ case being particularly splendid. The building needs minor repairs and maintenance to become fully effective.

3. Alterations: porch addition
24. Present condition: good
5. Other exterior features: 2-story bay, south elevation; deep setback on ell of the colonial revival style
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

To the north a walkway and residence; to the south, walkway and garden.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material.)

Winthrop Street developer William J. Farnsworth sold this lot to Samuel Ellison, a Melrose mason, in 1853. Ellison and Stephen Emery, a carpenter and owner of the adjacent lot, cooperated in building this residence and its twin at 616 Main Street. A one-story addition was made in 1964.

29. Historical and social data/significance

(national, regional or local importance relating to events, persons, places, themes)

The Greek Revival Winthrop and Main Streets residences are good examples of one of the first residential developments occurring with the subdivision of Melrose farmland. This lot and residence are part of the original Winthrop Street development of 1850-1855.

3. Building type 2 - family residence

14. Plan type Side Hall Entrance

5. No. of stories 2-1/2 bays 2

6. Foundation Brick & stone, raised

17. Walls Clapboard

18. Roof forms Gable

   materials Asphalt shingles

   features Gable end-Winthrop Street

19. Chimney(s) 2

10. Doors and windows Double entrance westside;

   2 windows, 1st story; 2 windows, 2nd story;

   one window in gable, all 6/6.

21. Porches and additions Front porch with double

   entrance; rear addition.

2. Outbuildings None

23. Alterations None

4. Present condition Fair

5. Other exterior features Returns; wood sashes,

   double doors; spindle columns on porch; applied

   wood ornamentation on lintels.
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Driveway on east and west side of building; small yard facing Winthrop St.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

Winthrop Street developer, William J. Farnsworth sold this lot to Jedenian V. Corson, a Melrose carpenter in 1852. Corson deeded the property to Farnsworth one year later after building a "dwelling house".

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

This lot is part of the original Winthrop Street Development 1850-1855. The Greek Revival Winthrop Street residences are good examples of one of the first residential developments occurring with the subdivision of Melrose farmland.

[Map of Winthrop St. area with building location marked.]
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the
building).

Facing south on Winthrop Street - driveway on east side.

27. Importance to setting

(great, moderate, minor, none, detrimental)

Though ordinary, this house contributes to the period unity of the street.

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators,
etc., characteristics of architectural style, specimen or period, or architect,
builder, or construction method, extent of surviving original material.)

The architectural significance of this building is increased due to its location
in one of the earliest suburban developments in Melrose. In addition, it helps
to create a continuity of architectural style, along with the surrounding
Greek Revival and Queen Anne houses built between 1825-1890.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

This lot is part of the original Winthrop Street Development (from 1850-55). The
Greek Revival Winthrop Street residences are good examples of one of the first
residential developments occurring with the subdivision of Melrose farmland.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment,

3. Building type: single-family house

4. Plan type: side hall, entrance

5. No. of stories: 2½ bays: 2

6. Foundation: brick

7. Walls: clapboard

8. Roof forms: gable with wide eaves
   Materials: asphalt shingle
   Features:

9. Chimney(s): (1) interior

10. Doors and windows: 2/2 and 1/1 sash; 2nd floor front bay window

11. Porches and additions: original porch

12. Outbuildings: garage

13. Alterations: entrance door; window blocked

14. Present condition: good

15. Other exterior features: trim; panels of diamond shingles; spindles on porch;
   moulded frame and applied rosette ornament on gable and barge boards

16. Lot size: 5,000 Sq. ft.

17. Distance from St.: 4 ft.

18. Approximate frontage: 50.43 ft.
26. Surroundings
   (landscaping, parks, sidewalks, buildings or alleyways that border the
   building).
   Facing south on Winthrop Street; driveways to the east and west.

27. Importance to setting
   (great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance
   (other uses and dates, previous locations and dates, assessment, elevators,
   etc., characteristics of architectural style, specimen or period, or architect,
   builder, or construction method, extent of surviving original material)

   Winthrop Street developer William J. Farnsworth sold this lot to George F. Boardman
   as part of a larger parcel. Boardman in turn, deeded the lot to Gustavus A.
   Cutter, a Melrose painter who built this residence in 1852.

29. Historical and social data/significance
   (national, regional or local importance relating to events, personages, themes)

   This lot is part of the original Winthrop Street development of 1850 to 1855.

    (present): Residence
10. Lot size: 6,400 Sq. ft.
11. Distance from St.: 10 ft.
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Front of building faces east on Winthrop Street; west, driveway and residence; east, lawn and shrubs.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

The Winthrop Street developer, William J. Farnsworth, sold this lot with a "dwelling house" to Benjamin S. Jones in 1855. This residence is an elaborate example of the Bracketed-Italianate style and retains practically all of its original features.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes. This residence may predate Farnsworth's Winthrop Street development. 9 Winthrop Street was the residence of Joseph S. Eastman (architect of the Bugbee and Barrett Block (1876) and Eastman's Block (1888)) from 1869 until his death in 1912.

14. Plan type irregular
15. No. of stories 2½ bays
16. Foundation stone
17. Walls wood clapboard
18. Roof forms gable, tower and bay
    materials asphalt shingle
    features 2-story bay windows (3)
19. Chimney(s) (3) with corbelled tops
20. Doors and windows varied: 1/1; pairs; eccentric divisions in upper sash.
22. Outbuildings
23. Alterations new entrance, casement sash
24. Present condition good.
25. Other exterior features bracketed eaves on bay windows; exotic tower roof, scalloped shingle trim on tower.
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Lawns around house retained at property line by 18" high granite slabs on rubblestone wall.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

George W. Farnsworth purchased this lot in 1886 and constructed his residence in 1889 after removing the earlier double cottage dwelling house that originally occupied the site.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

The lot is part of the original Winthrop Street development of William J. Farnsworth.

George W. Farnsworth was a prominent real estate developer in Melrose in the late 19th Century. This building is a good example of buildings constructed in Melrose by wealthy and/or prominent Melrose families.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

Additional trees and planting would improve the effect of this interesting structure.

21. Porches and additions

2. Outbuildings  Garage, 2 bay

23. Alterations  Remodeled 1936; 1976

4. Present condition  Very good

5. Other exterior features  Ocular window with (9) lights in gable to Main Street; 3 dormer windows facing south; wood brackets supporting panel window to the north/
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Driveways to the north and south; attractive landscaping close to the building.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

Chester S. Patten constructed this building originally as an office and two stores. It was remodeled in 1956 for the Melrose Cooperative Bank by Chester S. Patten using a design by W. H. Jones & Sons, Melrose architects.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

Originally this lot belonged to the William Emerson Estate before subdivision by Emerson's heirs. George W. Farnsworth's real estate office and residence (north of Farnsworth's residence at 630 Main Street) previously occupied this site.

(landscaping, parks, sidewalks, buildings or alleyways that border the
building).

Driveway to south and lawn to the north; small lawn and shrubs along Main St.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators,
etc., characteristics of architectural style, specimen or period, or architect,
builder, or construction method, extent of surviving original material)

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

Originally the lot belonged to the William Emerson estate before subdivision
by Emerson's Heirs, and is typical of the residential architectural development
that took place in Melrose in 1870's to 1880's.

30. Preservation considerations

5. **Other exterior features**: Domed turret and porch pavilion with copper finials. Porch with fret work and turned posts.
26. Surroundings
(lanscaping, parks, sidewalks, buildings or alleyways that border the building).

On a substantial lot at the corner of Emerson and Main Streets. Driveway to the west on Emerson Street.

27. Importance to setting
(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

Joel Atwood, a Melrose carpenter, built this residence for Anderson and Wells. A later owner, Dr. Ernest S. Jack added the 1-1/2 story turret and turreted piazza (1890-1910). The building survives in its original condition and is an excellent and unusual example of the Mansard style of architecture.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

This lot originally belonged with lot adjacent to its west to the Sally Fuller Estate. Heirs Saran Anderson and Martha Wells sold lot and residence to Joel Atwood in 1869. This residence is a good example of early construction on Emerson Street, later to become very fashionable residential area.

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators,
etc., characteristics of architectural style, specimen or period, or architect,
builder, or construction method, extent of surviving original material)

The previous edifice of the First United Methodist Church was destroyed
by fire on April 24, 1903. The present edifice constructed in 1904 uses
rough brick and stone and is modelled after the Central Methodist Church
of Brockton. A parish hall addition was made in 1925 by Chester E. Patton,
Builder, and successive additions were made in 1953 by Custance Brothers
and in 1964 by Scott Builders, Inc.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

Isaac Emerson, a local philanthropist donated land for the present church
and parsonage in 1857. A fire destroyed the original First United Methodist
Church in 1903 and the cornerstone for the present edifice was laid in
1904.

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

Tristram Griffin designed the school using Germantown brick and Braintree granite. This massive building costing $100,000, serves as a focal point for the civic area. (Dimensions: 76' x 164'), the gymnasium addition was built in 1936, J. Williams Beal, architect, and Frank E. Keniston, a Melrose builder. All (8) chimney caps removed because of deteriorating mortar, in 1953.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

The high school occupies the former site of the old burying ground. Before it was selected as location for high school, town had begun process of removing graves, anticipating use of site as common or for erection of Memorial Hall. Dedication: September 17, 1898

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

This building in its generous setting is essential to the civic center of Melrose.

It is solidly constructed and should be adapted for other use such as condominium housing when it is no longer needed as a school facility.

   (present) 1st Baptist
9. Use (original) Church
   (present) Church
10. Lot size 45,379 Sq. ft.
11. Distance from St. 59 ft.
13. Building type church
14. Plan type nave and transept
15. No. of stories 3½ bays
16. Foundation stone
17. Walls granite, limestone, brick
18. Roof forms varied gable
    materials slate
    features cross gable; polygonal hipped apse
19. Chimney(s)
20. Doors and windows entrance at base of off-center tower; stained glass window; gable wall transept.
21. Porches and additions 1951
22. Outbuildings none
23. Alterations
24. Present condition repointed, 1978, very good
25. Other exterior features four-story tower,
    north end; elongated arched openings;
    elaborate tracery and buttresses
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).
North-east corner of Main and Uphan Streets; to the north, lawn with trees and shrubs; granite curbing at edge of concrete sidewalk

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)
A brick building was initially contemplated, but later a Church of Weymouth seam granite with trimmings of Indiana limestone was constructed. Brick from a previous Church edifice was used in the interior walls. An addition was made to the east end in 1951, 100' x 48', designed by Albert M. Kreider.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)
This corner location has been the site for churches since 1828. The First Baptist Church constructed their original edifice in 1856 on this site, and a second church was constructed in 1874. The 1874 red brick Gothic Revival church was demolished and replaced by the present church. The cornerstone was laid May 30, 1906 and dedicated April 7, 1907.

Bastille-Neiley Architects, Boston, Survey Form B - 1978
13. Building type: Electrical sub-station
14. Plan type: Square
15. No. of stories: 1 bays
16. Foundation: Concrete
17. Walls: Brick; precast concrete block
18. Roof forms: Flat
   materials: Tar and gravel
   features: 
19. Chimney(s): 
20. Doors and windows: Panelled in slit windows;
   2nd floor; central entrance.
21. Porches and additions: 
22. Outbuildings: 
23. Alterations: 
24. Present condition: Good
25. Other exterior features: Molded precast
   concrete cornice-basement and belt courses and
   other trim; central panel with inscription.
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

Substantial lawn, Upham Street; driveway to the west; building to the east.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

Built at a cost of $50,000, the electric sub-station is architecturally similar to Medford and Everett sub-stations. With a 15' setback, the grounds were designed with lawn and to create an attractive setting for the building, and they function also as an important visual introduction to the Commercial area.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

19. **Chimney(s)**  
20. Doors and windows 3 entrance ways, 2 of them recessed, two double windows with wood lintels and shutters.  
21. **Porches and additions**  
2. **Outbuildings**  
23. **Alterations** 3rd floor removed 1961, vertical wood panel siding.  
4. **Present condition** Good  
5. **Other exterior features** 1st floor trapezoidal, 2nd floor rectangular.
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building)
Abuts 3 story commercial building to the south; at the corner of Main and Upham Streets.

27. Importance to setting

(great, moderate, minor, none, detrimental)
This building anchors the north end of the commercial block, and is visible from four main approaches.

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)
George Newhall purchased this building in 1872 and altered it by removing the low piazza and raising it one story with the addition of a mansard roof. Subsequent extensive alterations have extended the Main Street facade and resulted in removal of third story in 1961.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)
William J. Farnsworth, who had extensive land holdings in Melrose sold this building to George W. Newhall, it was then known as the Melrose House. Originally the Odd Fellows occupied the second floor. Newhall's shoe store has occupied the building since 1872.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)
The extensive alterations this building has undergone restrict it from being greatly important to its setting. With exterior improvements, its importance can be increased.

26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building). Facing west on Main St.; abuts buildings to the North and South.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

George W. Newhall built this block of brick, three stories high, corresponding in height with Eastman's block and measuring 45' x 65'. J. Lancaster of Malden was the mason.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

The Melrose Savings Bank was an initial occupant of Newhall's Brick Block, on the 2nd floor. By 1895 Frederick Clement moved to the present location in Newhall's Brick Block.

24. **Present condition**: Good  

25. **Other exterior features**: Central second floor terra cotta scroll panel (Eastman 1888); original recessed entrances; original cast-iron storefronts
26. Surroundings

(Landscaping, parks, sidewalks, buildings or alleyways that border the building).

East Main Street exposure; abuts building to the north; driveway to the south.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

J.S. Eastman’s original design for a long three-story brick commercial building with a mansard roof with twin turrets at the center established the style and fabric for successive building on the east side of Main Street. The third story and turrets were removed in 1927. Second story bay windows have also been removed.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

M.F. Eastman, a prominent Melrose merchant, built this block to contain businesses on the first floor. The Athletic Club and the Melrose Cycle Club occupied the second floor and a meeting hall was on the third floor.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

This building, though extensively altered has a very good cast iron storefront which can be further revealed and accentuated with good signage.

Abuts Stearns and Hill Building to the south, alleyway (Eastman Place) to the north.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

The 1931 one-story art deco building replaced a building of the Second Empire Style built in 1891 by Burrell and Swett. The structure of 1891 was three stories and contained a corner tower on the 2nd & 3rd stories to the north. The one story art deco building of 1931 exposes corner pilasters with sunbursts and patterning, with an aluminum facade that conceals an interesting art deco facade.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

Burrell & Swett hardware store Owners who built the Burrell & Swett Block shared it with H.G. Fields, a local real estate entrepreneur and the Melrose Post Office. The Melrose Club occupied the second story of the predecessor of the present stone structure.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

abuts 511-521; alleyway to south; concrete sidewalk.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

Original plan by Hartwell, Richardson and Driver for a three-story commercial building. The plan was later revised to a two-story building.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

Burrell & Swett's New Block (1896) sold to J. Augustus Barrett, thereafter known as Barrett's Block (1898). Burrell & Swett were Melrose merchants and real estate developers. This building was occupied by the post office from 1901-1925 and Larrabee and Stearns from 1925-1967.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

This building, by the same architects as the adjacent YMCA, is of good quality and adds an important unifying element to the street. It would be much more effective if restored to its original designed appearance.

4. Plan type: rectangular

5. No. of stories: 3 1/2, bays: 7

7. Foundation: stone

11. Walls: brick bearing walls

17. Rear elevation: clapboard and asbestos

18. Roof forms: side gables; 3 front dormers

18. Materials: slate with copper flashing and trim

18. Features: ball finials on dormers

19. Chimney(s):

21. Doors and windows: varied sizes and shapes; plate glass 1/1 with fixed transoms.

24. Present condition: good

26. Other exterior features: north side: 3rd floor stepped round-arched windows (5), with patterned brick; pool addition: slightly sloped gable roof; overhanging eaves; brick walls, connecting metal and glass hyphen; limestone panel on gable end-to-street wall, setback from street.
26. Surroundings

(Landscaping, parks, sidewalks, buildings or alleyways that border the building).

Important corner location. Alley on north side. Pool addition set back from corner with small brick plaza and free-standing wall in front with flagpole.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

The most impressive and best-designed building in downtown Melrose, the YMCA has fine proportions, elegant iron, brick, copper and terra cotta work and a dominant position on Main Street. A brick addition was made in 1919 by Angus MacDonald, Builder.

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

The present Melrose YMCA was dedicated on April 1, 1895. By 1911 its membership was 1,108, the largest in the country for a city of comparable size. In that period, it contained also the Public Library and the Melrose National Bank. It has been the center of the community's recreational activity for more than eighty years and continues to serve and expand its original functions.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

Protection, restoration and sensitive use of this building and its corner open space is most important in affirming and maintaining the quality and historic appearance of downtown Melrose.

d. research at Melrose Public Sources

e. checked by Robert G. Neiley

Bastille-Neiley Architects. Boston. Survey Form 3 - 1978
3. Building type: Commercial

14. Plan type: Rectangular

5. No. of stories: 1, bays: 4

16. Foundation: Brick and stone

17. Walls: Red brick in patterns

18. Roof forms: Flat

materials: Tar and gravel

features:

19. Chimney(s): 1

19. Chimney(s): 1

10. Lot size: 3,092 Sq. ft.

11. Distance from St.: 0 ft.

1. Town: Melrose, Massachusetts

2. Address: 481 Main Street (475-81)

3. Name:

4. Date: 1924 (Building permit)

5. Style: 1920 Commercial ecletic

6. Architect:

7. Builder:

8. Owner (original): Samuel Gorin

(present): Stavros A. Dinis

9. Use (original): Commercial/residential

(present): Residential/recreational

21. Porches and additions: None

22. Outbuildings: None

23. Alterations: None

24. Present condition: Good

75. Other exterior features: Cast concrete cornice and parapet can. Piers with stacked brick and soldier coursing.
26. Surroundings

(landscaping, parks, sidewalks, buildings or alleyways that border the building).

To north, YMCA swimming pool addition. Alleyway, to the east; Main Street to the west; adjacent to a commercial building to the south.

27. Importance to setting

(great, moderate, minor, none, detrimental)

28. Further explanation of architectural data/significance

(other uses and dates, previous locations and dates, assessment, elevators, etc., characteristics of architectural style, specimen or period, or architect, builder, or construction method, extent of surviving original material)

29. Historical and social data/significance

(national, regional or local importance relating to events, personages, themes)

Aaron Hill's residence originally occupied this site before Samuel Gorin moved it to 3-5 East Foster Street. Gorin's commercial block was constructed during the mid-1920's, during Melrose's second largest building surge.

30. Preservation considerations

(accessibility, re-use possibilities, capacity for public use and enjoyment, protection, utilities, context)

This orderly structure, which already has some good signage, would benefit from a second story in order to dominate its important corner location.

31. Bibliography, references, sources of dates

Assessors
Building permit
Atlas

32. Recording:

a. date September 1, 1978

b. organization Bastille-Neiley
